Of All Mediums in Business Economy

None is so Effective as

PRINTERS' INK

With printers' ink, the business man announces his entrance into the business world; with printers' ink he reminds the world through the indispensable "statement" that he is still there; with printers' ink he keeps his business records and conducts the many details of his business; with printers' ink he continues, through circular or press, to keep in touch with the people and the world — printers' ink is indispensable in business.

INTRODUCTION

THE 1922-1923 edition of R. L. Polk & Co's. Utah State Gazetteer & Business Directory is herewith presented by the publishers with the confident belief that the information embraced in its pages will be found as complete and accurate as can reasonably be expected in a work covering such an extensive field and containing such a vast amount of information. It is the only publication giving information regarding every city, town, village, hamlet and settlement in the state as well as showing the business and professional interests of each. It contains a complete list of the farmers and land owners arranged by counties giving the number of acres owned, the valuation of the acreage and the post office address which is a most reliable list for circulating purposes as well as for general information covering the territory outside of the towns and cities of the state.

The Gazetteer takes its standing side by side with all other modern conveniences in the business world. It is a public necessity. The information it contains cannot be found elsewhere. It is a book which cannot be replaced by any other and it is alike useful to both the cities of the state for which it is published and the strangers who have occasion to consult it. To gather the data for a Gazetteer requires at the head of the undertaking, one having experience and a goodly supply of capital.

We wish to acknowledge with thanks the co-operation extended to all those assisting us in gathering together the vast amount of data necessary for the compilation of this volume and also to thank our patrons for their generous support in subscribing to the publication.

BRIGHAM.

(Generally known as Brigham City)

Appropriately called "The City of Homes," is beautifully situated on the western slope of the Wasatch mountains, 20 miles north of Ogden. It is the county seat of Boxelder county and contains about 4,200 inhabitants. The O S L R R and the U I C Ry run through the city and the S P is but a few miles west. The residents of Brigham are nearly all engaged in fruit raising or farming, the former being the principal occupation. The strawberries and peaches of this place are especially famous and the supply has very seldom been equal to the demand. All kinds of fruit, however, can be raised at a profit and of fine quality. Immense orchards of peaches and prunes have been planted in recent years, and an annual "Peach Day" festival is held. Raising sugar beets is now receiving considerable attention and is already a profitable industry. The city has a natural advantage over any other in the state—it is never muddy. Built on an immense wash of gravel from the Boxelder canyon, no matter how hard it may rain, a few hours of sunshine will make the streets practically dry. This peculiarity of the soil does not, however, interfere with irrigation, and it is highly productive. The city has an electric light system, a creamery, a number of mercantile houses, 3 good banks, a cannery, a planing mill, lumber yards, and 2 live and up-to-date newspapers — The Boxelder News, The Boxelder Journal, also an en-

ergetic Commercial Club.

While for the most part a Mormon community, there is also here a Presbyterian church.

The public library, in its own cozy building, is deserving of special mention. The city is supplied with pure water from the Boxelder canyon, and has an excellent water system owned by the city.

This city was first settled in 1852 and the pioneers had to contend with many hardships and privations before the soil could be made productive and the environment suitable for civilized living. It is now, with its abundance of trees, healthful water supply, neat gardens and homes, paved, wide streets and withal its location, one of the most picturesque and prosperous cities in the state.

in excellent public library, several substantial and up-to-date mercantile houses, flour mill, saw mills and a live weekly newspaper—The Iron County Record. Here is located a branch of The Agricultural College of Utah having an enrollment of over 350 students, and noted for the high standard of scholarship attained by its graduates and the wide and practical scope of its curriculum. The city is lighted by electricity, has a fine water system, local and long distance telephone connection. Stage daily to Lund, Parowan and St George. Population 2900. Sheep raising, mining and farming are its principal industries. There are enormous coal and iron resources in the vicinity. The natural advantages of the country tributary to this city and the progressive spirit of its citizens, indicate that Cedar City must inevitably become the metropolis of southern Utah. W K Granger, postmaster.

LOGAN.

Logan City is a progressive municipality of about 11,000 people in Cache County, northern Utah. With a bonded indebtedness of but \$182,000, it has an assessed valuation of \$6,300,000. It is the county seat and metropolis of Cache county, a fertile farming district with a population of over 30,000. With this rich surrounding territory to draw from, Logan does a banking and retail business not to be expected in a city of less than 20,000. Logan is an established center for knitted goods and maintains four large knitting factories which sell to all the western United States. Not less famous is Logan as a candy center. Here again, four factories supply thousands with Logan's justly famous sweets. Logan is the home of a large milk condensory, three big milling companies, extensive lumber yards, and a large beet sugar factory.

Logan is one of the foremost educational centers in the West. Here are located the Utah Agricultural College with a resident student body of two thousand, the Brigham Young College and Normal School with registration of over one thousand, the New Jersey Academy, and up-to-date public school system comprising six large grammar schools and a spacious high school. The principal streets of Logan are paved, sidewalks reach every part of the city, and an efficient car system is in operation. A newly installed water system supplies water from pure canyon springs.

the city own and operates its own electric lighting and power plant. Located at the mouth of beautiful Logan Canyon, the city is on a scenic route to Bear Lake, mountain top resort. Tourists going to Yellowstone National Park also find that the route through Logan presents scenes of spectacular beauty. The city maintains free camping ground for tourists where mountain water and fuel for camp fires are furnished. Modern hotel accommodations and excellent garage facilities are available. A large wide-awake Chamber of Commerce of four hundred active members from the city and the county, and progressive Rotary Club are in existence. Cache County, the setting for Logan, is particularly noted for its fine dairy herds, high yielding beet fields, and its large meat yields. Modern barns dot the county testifying to the prosperity of its dairy farmers. Three large condensed milk factories whose products are sold over the entire country are in operation while another one is soon to be built. Four sugar factories are producing in the county and the contracts for a fifth have been let. The county flour, famous over the country for its excellent baking qualities, is produced in seven mills with a combined capacity of over 2000 barrels daily. Of special importance agriculturally, is the growth of the pea canning industry in the county. The climate of the valley is particularly adapted to the production of green peas. An extensive modern cannery is in operation supplied by nine vineries. This industry is destined to become one of the most important in the county. Cache county is served by a most progressive mail system. Over thirty-five miles of roads will be paved when contracts already are filled. A steam railway and an electric interurban place Logan City and the county in close touch with other sections of the west. As a place for a home combining ideal climate, model home environment, and excellent opportunities, the county stands unsurpassed.

Wasatch Academy

A strong coeducational boarding and day school, provides home-like surroundings for out-of-town pupils; gives thorough instruction in Grade and High School subjects; maintains attractive business department, as well as home economics, manual training and music; prepares pupils for best Universities and Colleges.

The school appeals to those who must rise by their own industry and ambition. It stimulates confidence, courage and faith in one's self.

Supports football, basketball, baseball, debating and public speaking.

Expenses moderate; Christian surroundings, atmosphere wholesome.

Catalog will be sent on application.

OGDEN.

Steady and solid growth marks the progress of Ogden city year by year and the year that is now passing is no exception. Ogden is predominant in the intermountain region as a railway center, packing house center, livestock center, grain milling center, grain handling center. Ogden capital controls the principal industries of this section, especially the sugar factories, the canning factories, the creameries, the

Ogden

milling and levator business, the packing industry and the live-stock companies. Extensive improvements are to be carried out in the railroad yards which will eliminate the possibilities of congestion on the steam roads entering Ogden. It is also planned to replace the present depot building. It is generally conceded that the scenic beauty and grandeur near by Ogden is unsurpassed in the United States or in any other country. A view from Mount Ogden presents more of the handiwork of nature than can be seen from any other peak in the United States, is a claim made and never disputed. From that elevation, two miles above the ocean and one mile above the city, may be seen several states, many cities, expansions of splendidly cultivated farms and orchards, many mountain chains and peaks and the great Salt Lake. The principal scenic attraction is Ogden canyon just east of the city. This famous and beautiful gorge attracts thousands of visitors each year by its magnificent scenery which is never passed. Thirty-four large artesian wells which now supply over two million gallons of water every twenty-four hours, the driest season having apparently no effect upon this quantity or quality of the flow. This flow is piped a distance of about eight miles and delivered into two cement reservoirs in the foothills in the east city limits. Ogden City with its immediate suburbs, shows a population of 39,356. Rufus A. Garner, postmaster.

the headquarters for mining men interested in the hyd o-carbon industry (gilsonite, elaterite, ozokerite and wax minerals in general). Price has a good electric lighting and water system owned municipally and whole mountains of asphaltum close to the city will be used in the near future for paving purposes. There is a splendid opening to the raising of blooded stock of all kinds. The sheep breeding and wool growing are of the greatest industries of this section. In Carbon county, of which this city is practically the distributing point there are 27 great coal mines, the pay roll of this industry alone amounting to \$1,000,000 a month, work continuing twelve months in the year. Price is the distributing point of supplies for the whole of Emery, Duchesne and Uinta counties. All mail and express, freight and other goods handled by the railroads for these counties will pass through Price. Price is headquarters of the largest government star mail route in the United States, a garage having been built at a cost of \$100,000 out of which operate a fleet of 42 trucks. Some of them weigh eight tons when loaded. A big force of mechanics keep the trucks in shape for the mountain roads. The payroll of drivers and mechanics amounts to \$60,000 per month. Wholesale grocery and general jobbing for all this territory is handled out of Price which is already the largest shipping station in the state outside of Salt Lake City. Other industries are honey, sugar bees, etc. The city has several substantial stores, lumber yards, bottling works, 10 hotels, several garages, etc. Long distance telephone. Stage daily to Emery, Sunnyside and Hiawatha. Exp Amer Ry. Tel W U. W F Olson, postmaster. Acme Clnrs & Tailors W F Myers mgr. Aguirre Lorenzo B mgr French Hotel & Merc Co. PROVO.

Nestling close to the beautiful Wasatch mountains, on an alluvial plain made by Provo river, is situated the City of Provo, the county seat of Utah county.

Provo has long been distinguished as the Garden City of the State, and well is it deserving of the distinction, because of the rich soil which it possesses.

Provo is eminently a residence town, situated as it is, only 48 miles from the capital of the State and blessed with splendid railroad facilities, being a central point for the Denver & Rio Grande Western, Los Angeles & Salt Lake Railroad and Salt Lake & Utah R R.

It has a splendid electric light system, good water system and first class police regulations. Its population is 13,152, and it is today one of the great commercial centers of our commonwealth.

Many important manufacturing institutions are now in operation within the city and the work of the early builders is plainly marked in the development of today. Manufacturing in a small way began when the pioneers first settled at this place.

The Brigham Young University, a prominent educational institution of the Mormon church, is Provo's educational pride, and is an honor to the State. Its average yearly attendance is 1,500 students. The courses given are the high school, commercial and collegiate.

The State Mental Hospital is also located at Provo. Provo may justly boast of her great advantages in water power and indeed, were the waters of Provo river harnessed and placed in operation, it would furnish sufficient power to turn all the wheels of machinery in the State. The Utah Power & Light Co has erected a plant at the mouth of Provo canyon of 10,000 horse power, fully utilized.

Aside from these more important industries in Provo City, are numerous business houses that are in a flourishing condition.

Aside from the Brigham Young University, there is a public school system that is second to none in the State, there being five modern school buildings within the city. The Proctor Academy is also a flourishing school of the Congregational church.

A splendid sewer system has within the last few years been laid in the city, and many modern residence places which use this system has recently been built.

The streets are kept clean and are beautified by elegant shade trees on either

Provo

side and there now exists twenty miles of paved sidewalks. Two of the most attractive boulevards to be found within the intermountain region have been built in Provo, one extends for a distance of nine miles, having a river front of three miles and a lake front of two and a half miles, the other running to Olmstead in Provo canyon.

Utah Lake within a few miles is a beautiful body of fresh water extending from Lehi on the north to Spanish Fork on the south, in Utah county, a distance of thirty miles, having an average width of twelve miles. Quite an extensive fishing industry is conducted on this lake.

Only a short run of ten miles over the Rio Grande carries the tourist from the Garden City to the beautiful Provo Canyon, where the scenery cannot be excelled and trout fishing is unequalled.

Salt Lake City

SALT LAKE CITY.

"The Center of Scenic America"
Population 153,130.

There is no mystery about the growth of Salt Lake City, it is just beginning to grow. The increase of population has been steady and natural, with no booms, no setbacks, no inflation of possibilities, but a growth that speaks well for the future.

Salt Lake City has all the resources, all the possibilities for future development of a new country, but a proven country. Our facts about chemical, oil, mineral and agricultural wealth are in the books of the United States Geological Survey, the United States Department of Agriculture, and other government bureaus. We are just coming to appreciate the extent and vastness of our natural resources. The figures are available for those who are interested.

Why is Salt Lake growing?

Here is the business center of the Intermountain west, with an area of hundreds of millions of acres. It is only yesterday that the first plow turned the virgin soil; that the first factory wheel turned; that the first coal was mined for local consumption; that the first copper, silver, lead, zinc and gold was mined. Salt Lake City is not growing alone, it can not grow alone. Its strength in business, in manufacturing, in finance, its growth in population, its prestige as the leading city of the vast Intermountain empire reflects the development of resources that are too vast for figures to present.

Within a radius of five hundred miles are most of the National Parks of the United States. The scenic wonders of southern Utah are, beginning to attract world tourists. Over 50,000 automobile tourists have visited Utah in 1921.

Within a few hours of Salt Lake City, by good automobile roads, are silver lakes, crystal streams, cool canyon resorts, wonderful fishing places and Great Salt Lake; all alluring, offering the resident and tourist unlimited opportunity to get out into the great outdoors.

The wholesale and jobbing business of Salt Lake City in 1920 totaled \$185,217,000, representing every line of merchandise, to more than 9,500 country merchants in six states. Salt Lake City is the jobbing center of the Intermountain territory. Retail business, in 1920, totaled \$64,473,000. From 1916 to 1920 the bank clearings of Salt Lake City increased 74% for the five years, an excellent indication of growth.

With only these few facts there is every reason for confidence in the future growth and development of Salt Lake City.

DRESS WELL

AT SMALL COST

EVERY MAN needs good style, wants it. Every man can afford to have it.

It requires fine all-wool fabrics and expert tailoring to bring out and hold style. Such quality means longer service; that's where the small cost comes in.

It's easy to be sure the style's right.

Make sure The Gardner & Adams Co. label is in the coat.

PLEA FOR HUMANE SLAUGHTERING.

Why are Americans so low in the scale of civilization when it comes to the Slaughtering of Food Animals? If kindness and being humane are the essence of Christianity, why have not so called Christian Churches made an effort to improve this condition?

Scientists have proven that animals bleed as well when stunned as when blood is taken without stunning. Dispsied Germany is 30 years ahead of our country in this respect.

People of Utah

WHEN YOU BUY SUGAR CONSIDER THESE TWO THINGS:

THIS CIRCULAR MARK UPON A SUGAR BAG MEANS THAT IT CONTAINS **TRUE WEIGHT** OF THE HIGHEST QUALITY SUGAR OBTAINABLE. IT IS A GUAR-
ANTY OF ALL THAT IS GOOD IN SUGAR.

EVERY BAG OF SUGAR BEARING THIS LABEL HAS PAID A LIBERAL SHARE
OF PROFIT TO THE FARMER, THE LABORER AND THE BUSINESS MAN OF
THE STATE OF UTAH.

AND BUSINESS DIRECTORY

NINTH EDITION

1922-23

Farmers and Land Owners Directory

(Copyright by R. L. Polk & Co. of Utah, 1922).

Note—In the following Lists of Farmers and Land Owners, same are arranged in alphabetical order under each county in which the land is owned. These names have been obtained from the Official Tax Lists at each County Seat, and are therefore considered correct. Following the name of each land owner, is given: First, number of acres owned; second, assessed valuation; third, owner's postoffice address.

The Murphy Bed is Mine in the Four Standard Sizes

If the remarkable success of the small modern apartments could be attributed to any one item, it would undoubtedly be the use of MURPHY-IN-A-DOR BEDS. We are Sole Agents for Utah and Idaho

The Murphy Bed is much more than a piece of furniture—it is a building device that is working a revolution in living customs.
